Nguyen Trung Kien

Java Backend Intern

0966313528 trungkiendev203@gmail.com https://trungkiendev.site/ Thanh Xuan, Ha Noi

CAREER OBJECTIVE

I am a final-year Information Technology student aiming to become a Backend Developer, with a foundation in Java, Spring Boot, RESTful APIs, and MySQL. I am looking for an opportunity to work in a practical environment where I can improve my backend development skills, optimize APIs and software development processes, and contribute to building stable and scalable products.

EDUCATION

Thuy Loi University **2022 - 2026**

Information Technology – Software Engineering

Trained in Software Engineering with hands-on experience in programming projects during academic studies.

CERTIFICATES

TOEIC 550 2023

SKILLS

Programming Languages	Java, PHP
Backend Frameworks	Spring Boot, Laravel
Frontend	HTML/CSS/JavaScript, Basic React
Database	MySQL, SQL Server, Oracle
Tools & Technologies:	Git, GitHub, Docker, AWS, Postman, GitHub Actions CI/CD
Concepts	OOP, MVC, Clean Code
Operating Systems	Basic Linux, Windows

PROJECTS

Badminton Matching Website 2026 - Present

Backend Developer

- Developed a badminton matching platform based on location, time, and player level.
- Built RESTful APIs with Spring Boot for post management and search features.
- Applied the Controller – Service – Repository architecture for the backend.
- Researched and implemented Spring Security, JWT, and API handling to complete authentication and user management features.
- Integrated a Python + Playwright crawler to synchronize data through APIs.
- Demo: https://www.badmintonmatching.site/

Laravel E-commerce Website 2025 - 2025

Web Developer

- Developed an e-commerce website using Laravel with shopping features for users and management features for admins.
- Implemented login, registration, product browsing, order placement, and CRUD management.
- Managed categories, products, and orders in the admin dashboard.
- Applied validation, MVC architecture, and designed the MySQL database.
- Source code: https://github.com/trungkiendev203/WebBanHang

Story Cooker (AI Video/Story Automation Tool) 2026 - Present

AI Application Developer / Python Developer

- Developed a Python desktop application to automate the video creation workflow.
- Built features for AI-powered script generation and voice synthesis using Gemini/OpenAI combined with local TTS.
- Integrated FFmpeg, OpenCV, PyDub, and yt-dlp for multimedia and video processing.
- Source code: https://github.com/trungkiendev203/STORY-COOKER---AUTO-VIDEO-MAKER
